Building Shelter

Cube

Building Shelter is a general contracting and custom homebuilding company serving Martha's Vineyard. The qualities we require in ourselves and our work are the same ones our customers prize – and expect: service, communication, quality, durability and investment value.

As we have become established and have grown we are increasingly enthusiastic about innovative, resourceful and value-minded solutions to construction, remodeling and home improvement challenges. We have a firm commitment to our environment and act on it in the green, sustainable, energy efficient homes, additions, kitchen & bath renovations and small projects that we build.

Custom Designed Efficiency

The purpose of this furniture is to utilize useful space that is often neglected. The benefits are **1**, maximize the use of costly enclosed and heated space in the home; **2**, increase efficient use of space; **3**, with effective use of existing space, smaller homes

requiring fewer resources are required; **4**, decrease clutter.

Cube

This piece is a seat, twin bed, recliner, and storage unit. The cushions, removable via Velcro, reveal a table to be used in the Asian way - with the cushions as seats and the revealed cherry wood top serving as a table. This is ideal for very small spaces such as cottages and city lofts.

Console and Cube Chairs

The background console, crafted of ash wood, is a work in progress. It offers a place to display objects of interest while at the same time secretly hiding the sound system, TV, Xbox, CD's and DVD within.

In the foreground are two ottomans that convert to additional seating and provide extra storage space within, also executed in ash wood.

Bed

Below the bed is a pull-out cherry drawer that houses bedding and pull out cherry nightstands.
